

POCKETSMART AI

1. Brainstorming & Ideation Phase

PROFESSIONAL PROJECT REPORT

1. Brainstorming & Ideation Phase

Phase Objectives

- Identify the problem of managing income, expenses, savings and purchase decisions.
- Understand student and everyday-user needs.
- Generate a simple smart budget-assistant idea.
- Combine budget calculation with budget-based recommendations.
- Define the initial scope and major features.

Problem Statement

Users may find it difficult to track spending and understand how much money remains after expenses. Manual calculations can be inconvenient and reduce financial awareness.

Proposed Solution

PocketSmart AI combines budget calculation and budget-based recommendations in one simple dashboard.

Initial Features

Income entry, expense entry, categorization, spending calculation, remaining budget, savings estimation, category recommendations and future AI integration.

Expected Outcome

A clearly defined problem, target users, project scope and initial feature list.

PocketSmart AI | Smart Budget & Recommendation Assistant
