

# POCKETSMART AI

## 7. Project Documentation Phase

### PROFESSIONAL PROJECT REPORT

## 7. Project Documentation Phase

### Phase Objectives

- Prepare complete technical and academic documentation.
- Explain design, development and testing.
- Make the project easy to understand and run.
- Maintain a clear GitHub README.

### Documentation Contents

Title, introduction, problem statement, objectives, scope, requirements, architecture, modules, technology stack, development process, testing, screenshots, GitHub structure, future scope and conclusion.

### README Structure

Project overview, features, technology stack, installation, execution, API information, screenshots, testing, future enhancements and license.

### Documentation Guidelines

Use consistent headings, clear screenshots, meaningful file names, concise explanations and accurate installation instructions.

### Academic Presentation

Prepare title, abstract, objectives, methodology, modules, screenshots, test results, conclusion and future scope.

### Expected Outcome

A professional project report and GitHub README.
