

POCKETSMART AI

8. Project Demonstration Phase

PROFESSIONAL PROJECT REPORT

8. Project Demonstration Phase

Phase Objectives

- Present the completed system.
- Demonstrate the complete user workflow.
- Explain major modules and technologies.
- Show testing and future enhancements.

Demonstration Procedure

1 Launch application. 2 Enter monthly income. 3 Enter expenses. 4 Calculate budget. 5 Show spending, remaining budget and savings. 6 Select category. 7 Enter purchase budget. 8 Display recommendations. 9 Show GitHub structure. 10 Explain testing and future scope.

Sample Scenario

A user enters income ■30,000 and expenses totaling ■18,000. The system calculates ■12,000 remaining. The user then selects a category and budget to receive matching recommendations.

Presentation Points

Explain the problem, solution, architecture, modules, technology stack, development process, testing and future improvements.

Expected Outcome

The evaluator can observe the complete flow from financial input to budget calculation and recommendation.

Future Enhancements

AI conversational assistance, database integration, authentication, spending charts, savings goals, live product data, reports and cloud deployment.
